***Election/Restrictions***

ELECTION OF SPECIES

1. This application filed on 15 June 2001 contains claims directed to the following patentably distinct species of the claimed invention:

LEVEL-I:

Species I: Claims 4, 6, 7, 10 are directed to a  $k(S/N)$  function.

Species II: Claims 4, 6, 7, 10 are directed to a  $k' (N/S)$  function.

Species III: Claims 4, 6, 7, 10 are directed to a  $k'' (N/N+S)$  function.

Species IV: Claims 18, 19, 20 are directed to artificial noise

LEVEL-II:

Sub-Species I: Claims 2, 9, 10 are directed to a linear relationship.

Sub-Species II: Claims 11-12 are directed to a polynomial ( bell-shaped curve).

Sub-Species III: Claims 13-14 are directed to psychoacoustic mean values.

2. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from LEVEL-I for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable; if any of species I, II, or III is chosen, one

of LEVEL -II must also be chosen. Currently, claim 1 is generic and comprises a function  $h(N)$ .

3. Applicant is advised that a reply to this requirement must include an identification of the species that is elected and sub-species if any of species I, II, or III is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramnandan Singh whose telephone number is (703)308-6270. The examiner can normally be reached on M-F(8:00-4:30).
